

IMPROVING YOUR SOIL CONDITION & NUTRITION

FOR SUSTAINABLE CULTIVATION

Farmsafe manufactures and distributes a range of organic and fortified organic products suitable for a wide range of agricultural, landscape and amenity purposes.

EXPORT

Farmsafe products are available for export to many parts of the world in customised packaging to suit the customers' highest standards.

EASE OF USE

Farmsafe organic fertilisers, based on composted chicken manure, is treated for pathogens before being pelletised for ease of application and spreading.

ORGANIC & CONVENTIONAL FARMING

Farmsafe offers pure organic products for organic farming systems or organic based products fortified with mineral nutrients.

LIQUID FERTILISERS

Farmsafe also offers a range of specialist liquid nutrient products designed for better crop and yield production.

PRODUCT RANGE

20KG LDPE Bag

40KG PP Woven Bag

Aviafic II

For Organic Farming systems

3-5-3, OMRI listed Organic fertiliser, with composted poultry manure and plant elements.

- Potted plants
- Young fruit trees
- Vegetables
- Lawn / golf course

- Organic composted materials help improves soil texture, soil quality, and water retention
- Improves soil micro-organism activity for better plant development
- Nutrition for greater yield and plant growth

Basafic (Pellet)

5-5-5-1+TE+HA: Organic Composite Fertiliser. Composted poultry manure plus mineral & trace element fertiliser.

- Ornamental plants
- Vegetables
- Fruit trees
- Nursery plants

- Suitable for young or small plants
- Improves soil texture, soil quality, & water retention
- Improves soil micro-organism activity for better plant development
- Strengthens plant roots
- Contains Humic Acid (HA), Trace Elements (TE), and Magnesium (Mg) which improves yield and plant growth

Super Green (Pellet)

Contains high nitrogen (N) for leafy vegetables

13-7-8-2+TE+HA: Composite Fertiliser. Composted poultry manure with fortification by mineral fertiliser to induce better plant development.

- Vegetables
- Fruit trees
- Vines
- Plantation crops

- Better water retention and nutrient provision
- Contains Humic Acid (HA), Trace Elements (TE), and Magnesium (Mg) which improves yield and plant growth
- Excellent balance of nutrients

Super Red/palm (Pellet)

Specially formulated for oil palm plantations

8-4-18-2+B+HA: Growth Inducing Composite Fertiliser. Composted poultry manure with fortification by mineral fertiliser which provides necessary nutrients during fruiting stage.

- Palm plantations
- Orchards
- Vines

- Better water retention and nutrient provision.
- Contains Magnesium (Mg), Boron (B), and Humic Acid (HA) which gives better yield
- Excellent nutrient combination for fruit stage development

Prolific Special (Pellet)

High potassium (K) fertiliser for fruiting crops

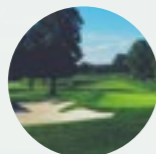

11-8-21-2+TE+HA : Fortified Organic Fertiliser. Composted poultry manure with fortification by mineral fertiliser.

- Oil palm
- Cocoa
- Black peppers
- Legumes
- Fruit crops

- Fertiliser designed for tropical soil and climate
- Contains Humic Acid (HA), Trace Elements (TE), and Magnesium (Mg) which improves yield and plant growth

Aviachips (Fines)

3-6-3 Fortified Organic Fertiliser. Composted poultry manure with fortification by mineral fertiliser.

- Golf courses & turf
- Potted plants
- Young fruit trees
- Vegetables

- Smaller than regular pellets which rapidly breaks down
- Improves soil texture, soil quality, and water retention
- Improves soil micro-organism activity for better plant development
- Better nutrition for greater yield and plant growth

Basal green (Ground)

High phosphorus (P) fertiliser in ground form. Ideal for root development

2-8-3 Organic Composite Fertiliser. Composted poultry manure with fortification by mineral fertiliser.

- Young fruit trees
- Vegetables
- Young plantation crops

- Improves soil texture, soil quality, and water retention
- Further enhance the growth of plant roots

Aviafic Basal (Ground)

2-6-3 Organic Composite Fertiliser. Composted poultry manure with fortification by mineral fertiliser.

- Cultivation beds
- Young fruit trees
- Vegetables
- Fruit
- Nursery crops

- Ideal for cultivation beds
- Improves soil texture and soil water retention
- Enhances the growth of plant roots

Enrich (Ground)

2-4-3 Organic Fertiliser. Composted poultry manure.

- Soil enrichment and amendment

- Adds texture and structure to soils
- Excellent for soil amendment
- Better water retention and nutrient provision

FARMSAFE, a sub-division of the Kenso Group, has been producing various fertiliser formulations since 1989 with the manufacturing facility based in Taiping Malaysia.

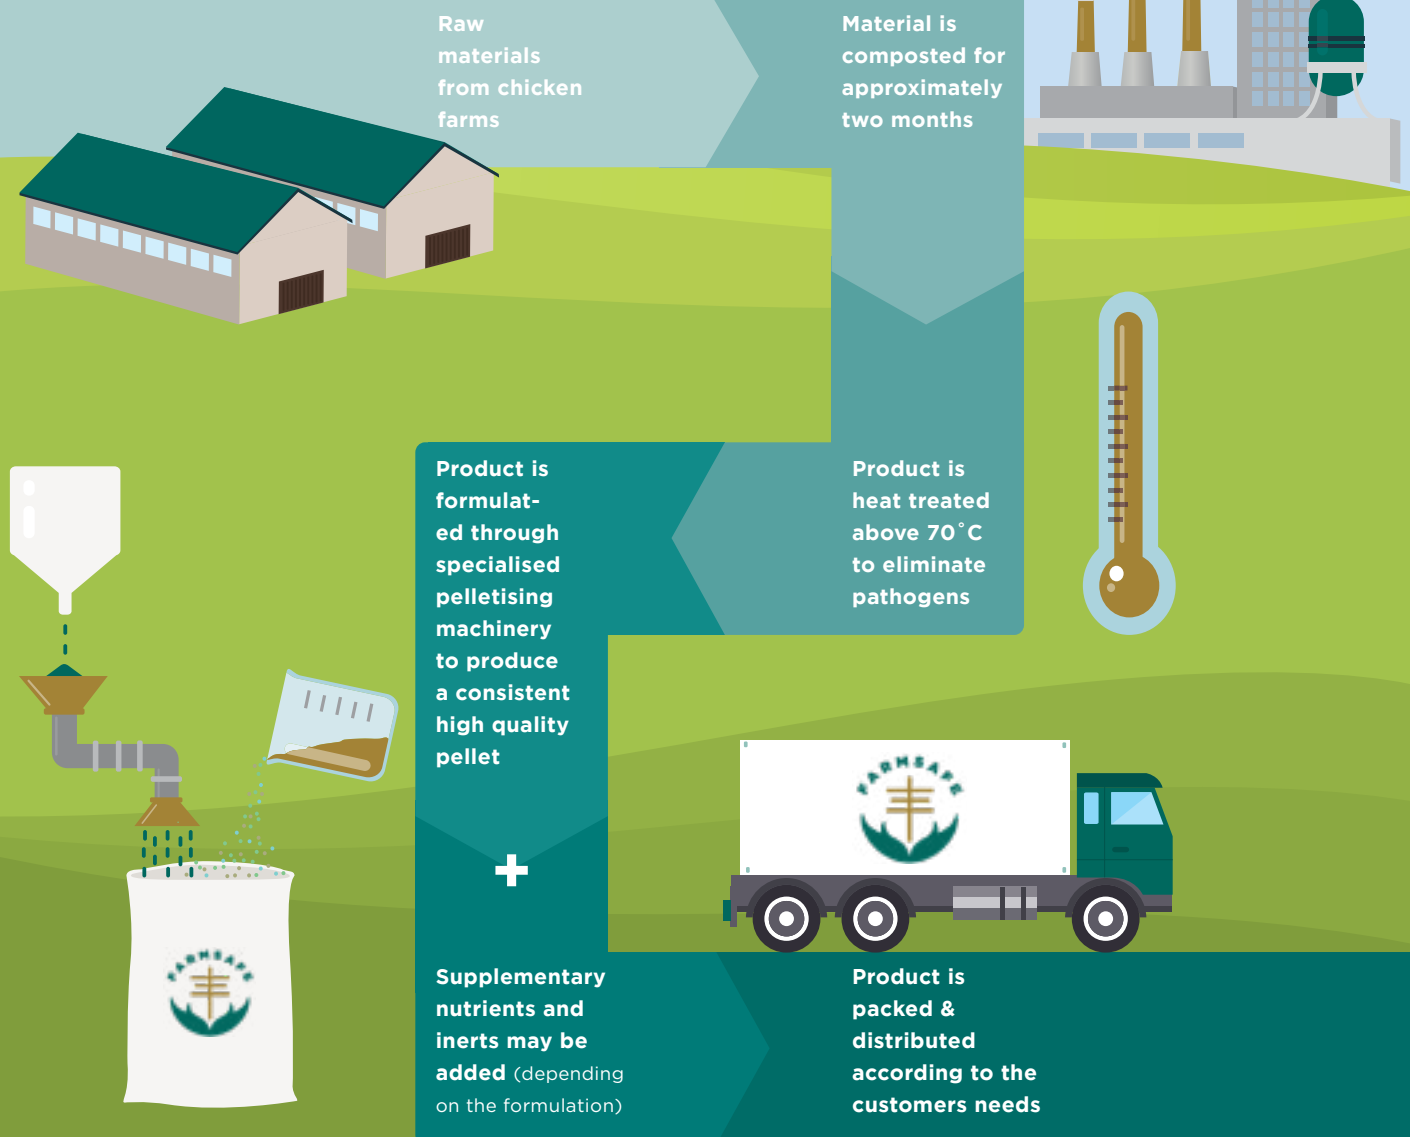

Farmsafe products are marketed under the Cap Bunga brand in Malaysia and various other trade names across the Asia-Pacific region.

Packaging can be customised to export customer needs

THE FARMSAFE PROCESS

KEY BENEFITS OF FARMSAFE PRODUCTS

- Natural soil improvement
- Consistent supply of plant nutrition to suit various applications
- Stringent manufacturing process
- Economical
- Products for sustainable agriculture
